	A	B	C	D	E	F	G	H	I	J	K	L
1	Income distribution of 1000 families follows Normal distribution with Mean 40000 and S.D. 10000. From this group one family is											
2	selected at random, compute the probability that income of this family lies.											
3		i) below 45000 ii) more than 42000 iii) between 45000 to 50000										
4	Also estimate the number of families whose income lies											
5		i) atleast 46000 ii) atmost 50000 iii) between 35000 to 50000										
6												
7	Solution:- Let, x=Income											
8	Here, we have											
9		Mean(μ)=	40000	S.D(σ)=	10000	N=	10000					
10	First Part											
11	i) Req.prob. =p(x<45000)				0.69146246	NORM.DIST(45000,C9,E9,1)						
12	ii) Req.prob. =p(x>42000)				0.42074029	1-NORM.DIST(42000,C9,E9,1)						
13	iii) Req.prob =p(45000<x<50000)				0.14988228	NORM.DIST(50000,C9,E9,1)-NORM.DIST(45000,C9,E9,1)						
14												
15	Second Part											
16	i) Req.prob. =N*p(x>=46000)				2743	G9*(1-NORM.DIST(46000,C9,E9,1))						
17	ii) Req.prob. =N*p(x<=50000)				8413	G9*NORM.DIST(50000,C9,E9,1)						
18	iii) Req.prob. =N*p(35000<x<50000)				5328	G9*(NORM.DIST(50000,C9,E9,1)-NORM.DIST(35000,C9,E9,1))						
19
